Fun Fibre Facts

This week we'd like to make everyone aware of the benefits that come with choosing VUMA!

1. Vumatel makes use of an Active Ethernet network, this means that VUMA can guarantee your line speeds. Say goodbye to "Up to" speeds.
2. VUMA's network is open access, this means you have a number of service providers to choose from. A large number of service providers means you can choose a package tailored to your needs. To view these packages, please [click here!](#)
3. Ordering an installation not only provides you with high-speed broadband but can also increase the value of your property.
4. There is no line rental or hidden costs on VUMA's network. The package you choose is the only cost you will incur every month. There is a once-off installation fee of R1710, which is the only amount you'll pay to VUMA.
5. VUMA has a 24hr support centre for all your queries, concerns or if you just want to chat to us:)
6. VUMA pings their network every 15 seconds, which means we'll probably know if your line is down before you do.

Please don't hesitate to contact us if you have any further queries or concerns by using the suburb email: woodmeadkhyber@vumatel.co.za

VUMA is ensuring you are always up and running!

Life is all about plan B! Thankfully you don't need one with us! With Vumatel's 15-second link monitoring, we will always make your plan A our priority! Order now by [clicking here!](#)

Kind Regards

The **VUMA** Team

Here's how you can keep updated!
