

We are already seven weeks into 2018 and for many 2017 seems like a distant memory! 24/7 Security Services had a busy festive season and we are happy to report that there were no serious incidents over the holiday period thanks to the good preparation and pro-active management by our teams in the field.

2018 is set to be an interesting year for South Africa. In addition to activities in the political and economic arenas, safety and security will remain top of mind. Violent crimes are still a big concern and we are continually looking at ways to manage this through maintaining a proactive visible presence in the areas we manage. We continue to explore, test and implement new technologies - such as drones and off-site monitoring - that best support our core business.

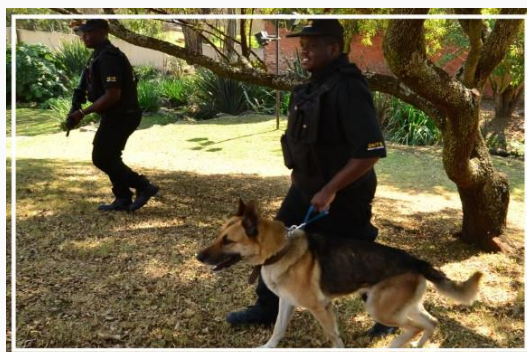

The Security Association of South Africa (SASA), of which 24/7 Security Services is a member, is currently in negotiation with 18 Trade Unions regarding salary levels as from 1 September 2018. The National Minimum Wage and amendments to the BCEA and LRA have a serious impact on this process. SASA is meeting with a high-level delegation of the Department of Labour on 19 February 2018 to obtain clarity regarding certain aspects of such new/amended legislation.

It has been six months since we launched the 24/7 Security Services K9 Unit. The success of the unit has by far exceeded our expectations and we look forward to growing this unit in 2018. The K9 Unit forms part of our Special Operations Teams. The unit's detection dogs conduct drug searches, provide support with patrols, and provide specialised assistance

with interventions such as strike control and explosives handling.

We offer our schools a free K9 demonstration and drug sweep of classrooms and premises. Calvin Christian heads up the 24/7 Security Services K9 Unit and will answer any questions you may have – please contact Calvin on 071 241 2173 or sotmanager@24-7security.co.za

If you have not yet downloaded the 24-7 Security app for your smart phone, remember this is free to use and turns your cell phone into a panic button. You can also request a technical visit, test your alarm or request a car to meet you at your house when arriving home. [Read more](#)

If you are struggling to access or download the app, please contact Naweed Adonis sysadmin@24-7security.co.za

Remote Off-Site Monitoring

Remote Off-Site Monitoring has proven itself as a successful and cost-effective way to monitor sites 24 hours a day.
