Bulletin 93:

AUTOMATION APPROVED!

On Wednesday last week, we received two decisions on pending road closure applications: in all three cases automation was approved.

Exact details of what is and is not allowed are not yet available but what has been approved is automated boom gates.

We would caution all areas not to implement automation without first obtaining permission from the City.

We have emphasized to the City that each road closure needs a bespoke solution and its unique circumstances

must be considered in deciding what structures to allow. We recommend you work with your chosen security provider to ascertain what form of automation / structures will optimize your security at a price that is acceptable to your residents and that such proposal be presented to the City at your next section 45(2) hearing.

If you need assistance in this regard give us a call. We are happy to work with your security company to maximize your security solution.

Best regards
