*Once the fire has passed, the bees will encounter the devastation of their environment in which they will have neither nectar nor pollen. The surviving swarms will be considerably weakened because of the loss of foraging which was possibly followed by the eating of existing eggs and larvae which could not be reared further due to such a lack of food.*

The spirit of South Africans was tested beyond imagination this last week, may I say this past year. Natural disasters, to name but a few, fires, floods, droughts, some manmade disasters, political turmoil, junk status, recession and who knows what more will follow. In fact, the generosity has been so bountiful that the requests for aid has been narrowed down to specific items.

We at Bee Movals will be concentrating on our valuable source of pollinators, bees. We offer specialized services and for that we need specialised equipment and in this case foraging, the sole supplier for substitutes resides in Gauteng. We ask our customers to please donate funds for us to obtain the following -

- Nectar Feed Substitute,
- Protein Feed/Pollen Substitute
- Feeders
- Water to mix the substitutes.

We hope to send a team to the affected areas to feed the Feral bee colonies, the feral colonies will be able to sustain themselves for a couple of days, depending on their honey resources in the hive. Feeding bees can cause a feeding frenzy and is not for the fainthearted it can lead to robber bees taking advantage of the free food, which in turn could lead to very aggressive bees flying around in the neighbourhood. These Feral colonies are essential in maintaining the health of our bees.

In return for your generosity we offer you the following:

- 10% discount on the next service we deliver to you.

Or

- Instead of a donation we offer you our Advantage Plan at a cost of R1000.00, This entitles you to a 15% discount on all future services, in our area of operation, and preferential lead times.

Our bee removal and relocation services is available in Gauteng and Cape Town, honey and equipment is available nationwide.

We thank you in advance for your kindness.

Kind Regards  
Len Boucher
